Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)
Office Action Summary	10/085,422	VERDECCHIA, WILLIAM A.
	Examiner	Art Unit
	Eric Keasel	3754
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).		
Status		
1) Responsive to communication(s) filed on 19Feb2004.		
2a) This action is FINAL . 2b) This action is non-final.		
3) Since this application is in condition for allowance except for formal matters, prosecution as to the ments is		
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.		
Disposition of Claims		
4)⊠ Claim(s) <u>1-17</u> is/are pending in the application.		
4a) Of the above claim(s) is/are withdrawn from consideration.		
5)⊠ Claim(s) <u>9-11,16 and 17</u> is/are allowed.		
6)⊠ Claim(s) <u>1-3,8 and 12-15</u> is/are rejected.		
7)⊠ Claim(s) <u>4-7</u> is/are objected to.		
8) Claim(s) are subject to restriction and/or election requirement.		
Application Papers		
_		
9) The specification is objected to by the Examiner. 10) The drawing(s) filed on <u>19Feb2004</u> is/are: a) accepted or b) objected to by the Examiner.		
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).		
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

DETAILED ACTION

Drawings

New corrected drawings are required in this application because a clean copy of the proposed amended drawings must be presented to the office. The changes submitted on 19 Feb 2004 are proper; however, it is now a requirement for a clean copy of the amended drawings to be submitted. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Response to Amendment

2. The declaration filed on 19FEB2004 under 37 CFR 1.131 has been considered but is moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3, 8, and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson (US Patent Number 5,967,182) in view of Lauer et al. (US Patent Number 6,182,689).

Wilson discloses a flush valve diaphragm (generally at 18) comprising a body portion and a peripheral sealing portion, the body portion being flexible and having a central passageway (76), the peripheral sealing portion comprising a sealing ring with a thickness greater than the body portion extending along the periphery of the flush valve diaphragm (shown best in Fig. 2);

Application/Control Number: 10/085,422

Art Unit: 3754

numerous integral rings on both sides of the flush valve diaphragm radially spaced from the

sealing ring; bypass orifice/chamber/exit chamber (84,86) positioned between the integral rings

and the sealing ring allowing fluid communication; and a barrel slide, which is partially passed

through the central passageway to which the diaphragm is secured and is secured to the

diaphragm through a threaded locking member (see Fig. 1).

Wilson fails to disclose the filter as an integral element with the diaphragm. Lauer et al.

disclose a similar flush diaphragm valve that has the filter integral with the diaphragm. It would

have been obvious to one having ordinary skill in the art at the time the invention was made to

have made the filter integral with the diaphragm in order to allow it to peripherally seal at both

edges and to provide a large filtering area as taught by Lauer et al. (see column 2, lines 11-31).

Allowable Subject Matter

5. Claims 9-11, 16, and 17 are allowed.

6. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be

allowable if rewritten in independent form including all of the limitations of the base claim and

any intervening claims.

Response to Arguments

7. Applicant's arguments have been considered but are most in view of the new ground(s)

of rejection.
